DETAILED ACTION

Response to Amendment

- 1. The amendment filed on 3/5/04 has been received. As requested, the specification and claims 2 and 5 have been amended.
- 2. Claims 2-7 are pending in the instant application.

Allowable Subject Matter

- 3. The indicated allowability of claims 2-4 is withdrawn in view of the newly discovered reference(s) to U.S. Patent Nos. 5,865,772 and 6,051,747. Rejections based on the newly cited reference(s) follow.
- 4. Claims 5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Information Disclosure Statement

5. The information disclosure statement filed 3/24/05 has been received. Note the acknowledged from PTO-1449 enclosed herewith.

Drawings

6. The drawings were received on 3/5/04. These drawings are approved by the examiner.

Application/Control Number: 10/009,294 Page 3

Art Unit: 3743

Claim Rejections - 35 USC § 103

7. The factual inquiries set forth in *Graham* v. *John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

- 1. Determining the scope and contents of the prior art.
- 2. Ascertaining the differences between the prior art and the claims at issue.
- 3. Resolving the level of ordinary skill in the pertinent art.
- 4. Considering objective evidence present in the application indicating obviousness or nonobviousness.
- 8. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).
- 9. Claims 2-4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 5,865,772 ("George") in view of U.S. Patent No. 6,051,747 ("Lindqvist et al.").

As regards claim 2, George discloses an apparatus capable of stimulating healing of wounds, which comprises an envelope (10) for receiving an affected part of the body, said envelope including a substantially air-tight cover (abstract, col. 3, lines 1-5 and col. 7, lines 5-7), dressing, bandage or cast within the cover, and connecting

Application/Control Number: 10/009,294

Art Unit: 3743

means (pump 12) for connecting the interior of the envelope to a source of negative pressure, wherein said envelope is a glove, sock or sleeve.

George fails to teach that the dressing comprises a porous pad. However, Lindqvist et al. disclose a conventional dressing in the bandage/dressing art comprising a porous pad. Thus, it would have been an obvious to one having ordinary skill in the art at the time the invention was made to substitute the dressing of George for the dressing of Lindqvist et al. since it appears that the invention of George would perform equally well with any type of dressing.

As regards claim 3, George discloses that the device is capable for use on the hand (col. 7, lines 33-36) George fails to teach that the device has an additional external cover of air–impermeable material. However, the examiner contends that it would have been obvious to provide an additional layer of the same material, thereby providing an external air-impermeable cover in order to strengthen the device. Duplicating the layer of the device to strengthen the device requires only routine skill.

As regards claim 4, the pump, which comprises a tube at its inlet and outlet, inherently communicates with the dressing (pad) since it communicates with the interior of the device.

As regards claim 6, the pump is a vacuum pump otherwise termed a suction pump.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kim M. Lewis whose telephone number is (571) 272-
